

## GILM - Global Innovative Leadership Module

**Category :** Entrepreneurship and Startups, Leadership, ICT Skills

**Target Group :** 18 - 30 Young People

### **Project Aims :**

Past developments have shown that ICT-related occupations are much more resistant to crises than most other jobs. The market absorbs more than the annual output of ICT graduates from educational institutions. Consequently, today, investing in e-skills entails even greater opportunities and fewer risks. European Commission's Publication "e-Leadership Skills for Competitiveness and Innovation" (2013), the job market demand rises by 227,000 e-leaders to a total of 915,000 people annually Europe-wide. et, economies cannot meet the adequate qualified supply.

Global Innovative Leadership Module (GILM) project believes that one of solutions for the current young unemployment passes through the university or development and training on the ICT based capabilities after graduation. The growing importance of ICT for both business operations and innovation is an opportunity for professionals and youngsters who are e-skilled.

The project aims to build competitive knowledge-based European youth societies through developing their e-leadership potential and creativity competencies; and to transfer these into a workable solution against youth unemployment by closing the gap between the more advanced and successful EU members and the countries lagging behind.

## GILM - Global Innovative Leadership Module

### Outputs :

- 1 - Training Guide and Assessment Toolkit on E-Leadership and Digital Competences
- 2 - e-leaderstochange Internet Platform (Digital learning module, database and information exchange platform, monitoring and analysing tools, online open access courses belong to sub modules)
