

International Green Entrepreneurship and Innovative Employment Center

Category : Sustainable Development, Entrepreneurship And Startups

Target Group : Green Enterprise Candidates, Eco Innovators

Project Aims :

To contribute and develop green entrepreneurship ecosystem and raise new, innovative, scalable enterprises. Within our project an International Green Entrepreneurship and Innovative Employment Center (IGEC) will be built.

This green enterprise center will work as a network and be a center of consultancy, education, business development activities. By bringing staff that will work within the center, independent experts, NGO workers, investors, academicians and entrepreneur candidates together this center will hold some activities such as; idea workshops, joint study grounds, workshops, education activities and consultancy service.

Thanks to this, on our transfer to innovation centered economy there will be more green entrepreneurs who can make a difference and a new ecosystem in this area will started to be created. At the same time the possibility that young being employed will increase.
