

Innovative Systems to Improve Skills and Competences of Supported Employment Providers

Category : Innovation, Disability, VET, Skills and Competences

Target Group : Supported employment providers- job coaches, career counsellors, social workers, job specialist who directly working with people with disabilities and implementing the Supported employment process

Project Aims :

Supported employment (SE) approach defined as a method of working with disabled people and other disadvantaged groups to access and maintain paid employment in the open labour market.

This identification is as very beneficial to the PwD and it gives clear quality improvement of the accessibility to the labour market for those targets. People with disabilities are the most disadvantaged group with regards to employment and they will directly benefit from the SE implementation by well-qualified SE providers such as coaches, mentors, counsellors, job specialists etc.

The European union of Supported Employment in 2013 Annual report (page 46) declares the need of methodology and system for recognition, validation and certification of the skills of the SE providers. "Innovative Systems For SE" will develop of dedicated VET programme for training of job coaches of people with disabilities which does not exist so far in Europe as officially accredited job profile.

The project project will continue supporting the inclusion of the supported employment approach where this will be done for the first time by developing EQAVET system for recognition, validation and accreditation of their knowledge, skills and competencies.

Innovative Systems to Improve Skills and Competences of Supported Employment Providers

Outputs :

- 1 - Consolidated Survey Findings
- 2 - EQAVET System for Recognition, Validation And Certification of SE Providers
- 3 - Instructions Guide for the SE Competencies Monitoring Service
- 4 - "Innovative Systems for SE" VET Training Programme For Supported Employment Providers
- 5 - Usability report
- 6 - "Innovative Systems for SE" Online Learning System

Activities :

- 1 - Study Visit : Blended Mobility of VET Learners
- 2 - Study Visit : Blended Mobility of VET Learners
- 3 - Study Visit : Blended Mobility of VET Learners
- 4 - Final EU Conference
